

Big order : SAUDI ARABIA

In 2006, ELIS PLZEN a.s. won a tender on delivery of 47 water meters and flow meters for piping sizes ranging from DN 150 to DN 600 as part of a water supply project in Saudi Arabia. The investor selected battery-powered ultrasonic flow meters designated **FLOMIC FL1024** and **FL3085** because of their technical parameters and advantageous price. The flow meters delivered to the Saudi Arabia customer in the beginning of September 2006 will become part of one of the largest projects of its kind comprising construction of drinking water supply lines to 63 villages in the desert region and 2 sewage-water treatment plants.
